

1) Найти область определения функции

$$z = \sqrt{1-x^3} + \ln(y^2-1)$$

$$\begin{cases} 1-x^3 \geq 0 \\ y^2-1 > 0 \end{cases}$$

$$x^3 \leq 1$$

$$y^2 > 1$$

$$x \in (-\infty; 1)$$

$$y \in (-\infty; -1] \cup [1; +\infty)$$

2) Найти производные  
порядка функции 1-20

$$z = \left(1 + \frac{\ln x}{\ln y}\right)^3$$

$$\frac{\partial z}{\partial x} = 3 \left(1 + \frac{\ln x}{\ln y}\right)^2 \cdot \frac{1}{x \cdot \ln y}$$

$$\frac{\partial z}{\partial y} = 3 \left(1 + \frac{\ln x}{\ln y}\right)^2 \cdot \frac{1}{y} \cdot \left(-\frac{\ln x}{\ln^2 y}\right)$$

3) Найти полный дифференциал функции в точке (1; 1)

$$z = \sqrt{2xy + \cos \frac{x}{y}}$$

$$dz = \frac{\partial z}{\partial x} dx + \frac{\partial z}{\partial y} dy$$

$$\frac{\partial z}{\partial x} = \frac{1}{2\sqrt{2xy + \cos \frac{x}{y}}} \cdot \left( 2y + \sin \frac{x}{y} \cdot \frac{1}{y} \right)$$

$$\frac{\partial z}{\partial y} = \frac{1}{2\sqrt{2xy + \cos \frac{x}{y}}} \cdot \left( 2x - \sin \frac{x}{y} \cdot \left( -\frac{x}{y^2} \right) \right)$$

$$dz = \frac{2y - \frac{\sin \frac{x}{y}}{y}}{2\sqrt{2xy + \cos \frac{x}{y}}} dx + \frac{2x + \frac{\sin \frac{x}{y} \cdot x}{y^2}}{2\sqrt{2xy + \cos \frac{x}{y}}} dy$$

~~Handwritten scribbles and crossed-out calculations at the bottom of the page.~~

$$d^2 z(1,1) = \frac{2 - \sin 1 + 2 + \sin 1}{2\sqrt{2 + \cos 1}} =$$

$$= \frac{4}{2\sqrt{2 + \cos 1}}$$

4) Исследовать на экстремум функции.

$$Z = x^2 + xy + y^2 - 6x - 9y$$

$$\begin{cases} \frac{dz}{dx} = 2x + y - 6 \\ \frac{dz}{dy} = x + 2y - 9 \end{cases}$$

$$2x + y - 6 = 0$$

$$y = 6 - 2x$$

$$x + 2y - 9 = 0$$

$$y = \frac{9 - x}{2}$$

$$6 - 2x = \frac{9 - x}{2}$$

$$12 - 4x = 9 - x$$

$$-3x = -3$$

~~$$x = 1$$~~

~~$$y = 4$$~~

$$x = 1$$

$$y = 4$$

$$Z''_{xx} = 2$$

$$Z''_{xy} = 1$$

$$Z''_{yy} = 2$$

$$\begin{vmatrix} 2 & 1 \\ 1 & 2 \end{vmatrix} = 4 - 1 = 3 > 0$$

$2 > 0 \Rightarrow M(1, 4)$  — точка минимума
